## 2100 Bingo: A Look Ahead

**2000 → 2100**  
**Mini Bingo**

Flying Cars... Finally!	2°C rise in global average temperature	Technological Warfare... for the Rich
Cure for AIDS	<b>WILD CARD: World War III Starts Over... Greenland?</b>	Human Cloning
Human Population Reaches 10.2 Billion	Telepathy	Mass Extinction Event

What we thought would be in the near future can sometimes occur farther ahead. Flying cars, for instance, might be common in the 22<sup>nd</sup> Century instead of the assumption that they would be here by the early 21<sup>st</sup> Century. Will we get the full bingo? Given that some of these predictions, we hope not!

## Traditional vs. DIY-Consulting: What's the Difference?

Traditional Consulting has long been a very involved and expert-driven process. However, there are several changes and upheavals occurring, from the COVID-19 pandemic to the sudden and rapid gains made by AI in the past few years. This places the onus on consulting as a field to adapt. DIY-Consulting is one way to do so. The article tells you more about how it can help you.

## What's the Word? Experts on the Future

Many experts have sounded off on the potential future of humanity. Whether it's AI dominance or personal tech or even the future of shopping, everyone has something to say. We decided to compile some of the many possibilities that may be down the line. Of course, the future will likely look very different from what we imagine, as prior predictions have shown.

**"I believe synthetic companions are the next opioid crisis for young people."**  
- Scott Galloway, Academic & Entrepreneur

**"... People are going to get diseases and AI is going to come up with a cure, very soon..."**  
- Ray Kurzweil, Futurist

However, these findings will likely have some grain of truth that can help us prepare for the future that it is to come, in this emerging world order.
